IMPORTANT SAFEGUARDS

IMPORTANT SAFEGUARDS

Follow all warnings and instructions marked on this color television.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK).
NO USER SERVICEABLE PARTS INSIDE.
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle, is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING:

TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS COLOR TELEVISION TO RAIN OR MOISTURE.

NOTE:

- There are no user serviceable parts inside the television.
- Model and serial numbers are indicated on back side of the television.
- This television is not intended for use in a computer room.

CAUTION: • Adjust only those controls that are covered in the instructions, as improper changes or modifications not expressed approved by Hitachi could void the user's warranty.

MODIFICATIONS: • The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by Hitachi America, Ltd. Home Electronics Division may void the user's warranty.

POWER SOURCE:

This color television is designed to operate on 120 volts 60Hz, AC current.

Insert power cord into a 120 volt 60Hz outlet.

TO PREVENT ELECTRIC SHOCK, DO NOT USE THE TELEVISION'S (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE, OR OTHER OUTLET UNLESS THE BLADES AND GROUND TERMINAL CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

NEVER CONNECT THE TV TO 50Hz, DIRECT CURRENT, OR ANYTHING OTHER THAN THE SPECIFIED VOLTAGE.

NOTE: This television receiver will display television closed captioning ( or ) in accordance with paragraph 15.119 of the FCC rules.

CAUTION: Never remove the back cover of the television as this can expose you to very high voltages and other hazards. If the television does not operate properly, unplug the television and call your authorized dealer or service shop.

IMPORTANT SAFEGUARDS

SAFETY POINTS YOU SHOULD KNOW ABOUT YOUR HITACHI TELEVISION RECEIVER

CAUTION:

- * Read all of these instructions.
- * Save these instructions for later use.
- * Follow all warnings and instructions marked on the television receiver.

Our reputation has been built on the quality, performance, and ease of service of HITACHI televisions.

Safety is also foremost in our minds in the design of these units. To help you operate these products properly, this section illustrates safety tips which will be of benefit to you. Please read it carefully and apply the knowledge you obtain from it to the proper operation of your HITACHI television receiver.

Please fill out your warranty card at once and mail it to HITACHI. This will enable HITACHI to notify you promptly in the improbable event that a safety problem should be discovered in your model of product.

FOR YOUR PERSONAL SAFETY

1 This television set is equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

2 When the power cord or plug is damaged or frayed, unplug this television set from the wall outlet and refer servicing to qualified service personnel.

3 Do not overload wall outlets and extension cords as this can result in fire or electric shock.

4 Do not allow anything to rest on or roll over the power cord, and do not place the TV where the power cord is subject to traffic or abuse. This may result in a shock or fire hazard.

5 Do not attempt to service the television set yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

6 Never push objects of any kind into this television set through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the television set.

IMPORTANT SAFEGUARDS

7 If the television set has been dropped or the cabinet has been damaged, unplug this television set from the wall outlet and refer servicing to qualified service personnel.

8 If liquid has been spilled into this television set, unplug it from the wall outlet and refer service to qualified service personnel.

9 Do not subject your television set to impact of any kind. Be particularly careful not to damage the picture tube surface.

10 Unplug this television set from the wall outlet before cleaning. Use a damp cloth for cleaning. Do not use liquid cleaners or aerosol cleaners.

11-1 Do not place this television set on an unstable cart, stand, or table. The television set may fall, causing serious injury to a child or an adult, and serious damage to the appliance. Use only with a cart or stand recommended by the manufacturer, or sold with the television set. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

11-2 An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

PROTECTION AND LOCATION OF YOUR TELEVISION

12 Do not use this television set near water, for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.

- Never expose the set to rain or water. If the set has been exposed to rain or water, unplug the set from the wall outlet and refer servicing personnel.

13 Choose a place where light (artificial or sunlight) does not shine directly on the screen.

IMPORTANT SAFEGUARDS

14 Avoid dusty places. Accumulated dust inside the chassis may cause failure of the television when high humidity persists.

15 The television has slots or openings in the cabinet for ventilation purposes which provide reliable operation of the receiver and protect the television from overheating. These openings must not be blocked or covered.

- Never cover the slots or openings with cloth or other material.

- Never block the bottom ventilation slots of the television by placing it on a bed, sofa, rug, etc.

- Never place the television near or over a radiator or heat generator.

- Never place the television in a built-in enclosure, unless proper ventilation is provided.

PROTECTION AND LOCATION OF YOUR SET

16-1 If an outside antenna is connected to the television set, be sure the antenna system is protected against voltage surges and built up static charges, Section 810 of the National Electrical Code, NFPA No. 70-1975, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrode, and requirements for the grounding electrode.

16-2 **Note to CATV system installer:** (Only for the television set with CATV reception) This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

17 An outside antenna system should not be located in the vicinity of overhead power lines or other electrical lights or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.

IMPORTANT SAFEGUARDS

18 For added protection for this television set during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage due to lightning and power-line surges.

OPERATION OF YOUR TELEVISION

19 This television set should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply at your home, consult your television dealer or local power company. For television sets designed to operate from battery power, refer to the operating instructions.

20 If the television set does not operate normally by following the operating instructions, unplug this set television set from the wall outlet and refer servicing to qualified service personnel. Adjust only those controls that are covered in the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the television set to normal operation.

21 When going on a holiday: If your television set is to remain unused for a period of time, turn the television set "off" and unplug it from the wall outlet.

IF THIS SET DOES NOT OPERATE PROPERLY

22 If you are unable to restore normal operation by following the detailed procedure in your operating instructions, do not attempt any further adjustment. Unplug the set and call your dealer or service technician.

23 Whenever the television set is damaged or fails, or a distinct change in performance indicates a need for service, unplug the set and have it checked by a professional service technician.

24 It is normal for some TV sets to make occasional snapping or popping sounds, particularly when being turned on or off. If the snapping or popping is continuous or frequent, unplug the set and consult your dealer or service technician.

FOR SERVICING AND MODIFICATION

25 Do not use attachments not recommended by the television set manufacturer as they may cause hazards.

26 When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

SUPPLIED ACCESSORIES.

27 Upon completion of any service or repairs to the television set, ask the service technician to perform routine safety checks to determine that the television is in safe operating condition.

PICTURE CAUTIONS

Picture Burn Prevention

- Continuous on-screen displays such as video games, stock market quotations, computer generated graphics, and other fixed (non-moving) patterns can cause permanent damage to color television receivers. Such "PATTERN BURNS" constitute misuse and are NOT COVERED by your HITACHI Factory Warranty.

Public Viewing of Copyrighted Material

Public viewing of programs broadcast by TV stations and cable companies, as well as programs from other sources, may require prior authorization from the broadcaster or owner of the video program material.

SUPPLIED ACCESSORIES.

 Infrared Remote Control Part Number : CLU-341U	 Size AA Dry Batteries

BEFORE OPERATING YOUR TELEVISION

Location

- For normal operation, your TV should be located in an area of the room where cool adequate ventilation is provided. Do not place the back of the television set in a place where free airflow will be restricted.
- Any magnetic force may disturb the color picture. Make sure that magnets, electric clocks, toys using magnets or any other magnetic substance, such as iron are kept well away from this set.

Power

Your TV operates on 120 Volts, 60 Hertz (normal household current) and has a polarized plug. If you are unable to insert the plug fully into the outlet, try reversing the plug. Should it fail to fit, contact an electrician. Do not defeat the safety feature of the polarized plug.

NOTE:

- If the set will not be used for a long period, such as during a vacation, unplug the set from the wall outlet to economize power. (If the TV set is plugged in, a slight current still flows, even with the POWER BUTTON in the OFF position.)
- Lines and other noise may appear in TV broadcast images when an FM tuner or radio is located near the TV and both radio and TV broadcasts are being received. Should such noise appear, turn off either the TV or the radio.
- If you are listening to an AM broadcast, turn the TV off. AM broadcast signals may not be received due to the interference of the TV.

ANTENNA CONNECTIONS

Before using the television, prepare the Remote Control

To use the remote control, insert batteries first.

Insert the batteries

- With your thumbnail, pull up the slit as indicated by the arrow to remove the back cover. Insert two batteries (size "AA"). Be sure to match the battery \oplus / \ominus with the \oplus / \ominus marks inside the compartment.

ANTENNA CONNECTIONS

Antennas

- The antenna requirements for good color television reception are more important than those for black & white television reception. For this reason, a good quality outdoor antenna is strongly recommended. The following is a brief explanation of the type of connections that are provided with the various antenna systems:

1. A 75 ohm system is generally a round cable with F-type connector that can easily be attached to a terminal without tools (not supplied). **The F-type connector should be finger-tightened only.**

2. A 300 ohm system is a flat "twin-lead" cable that can be attached to a 75 ohm terminal through a 300-75 ohm ADAPTOR (not supplied).

OUTDOOR ANTENNA CONNECTION .

- Use one of the following two diagrams if you connect an outdoor antenna.
 - A: Using a VHF/UHF combination outdoor antenna.
 - B: Using separate VHF and/or UHF outdoor antenna.
- Connect an outdoor antenna cable lead-in to the COAXIAL CABLE CONNECTOR on the rear of the TV set.

CABLE TV (CATV) CONNECTION

- A 75 ohm coaxial cable connector is built into the set for easy hookup. When connecting the 75 ohm coaxial cable to the set, screw the 75 ohm cable to the COAXIAL CABLE CONNECTOR.
- Some cable TV companies offer "premium pay channels". Since the signals of these premium pay channels are scrambled, a cable TV converter/descrambler is generally provided to the subscriber by the cable TV company. This converter/descrambler is necessary for normal viewing of the scrambled channels. (Set your TV on channel 3 or 4. Typically one of these channels is used. If this is unknown, consult your cable TV company.) For more

QUICK REFERENCE CONTROL OPERATION

specific instructions on installing cable TV, consult your cable TV company. One possible method of utilizing the converter/descrambler provided by your cable TV company is explained below.
Please note: RF switch equipped with position A/B (not provided) is required.

"A" position on the RF switch (not supplied): You can view all unscrambled channels using the TV's channel keys.

"B" position on the RF switch (not supplied): You can view the scrambled channels via the converter/descrambler using the converter's channel keys.

CLOSED CAPTION

You can enjoy HI-FI stereo sound or SAP broadcasts where available.

- Stereo broadcasts
Live television transmission of sports, show, concerts, etc. can be received in dynamic stereo sound.
- SAP broadcasts
Television broadcast can be received with either MAIN or SAP sound.
MAIN sound: The normal program soundtrack. (Monaural or stereo where available.)
SAP sound: Second language, supplementary commentaries, etc. (SAP sound is monaural.)

If stereo sound is difficult to hear.

- You can obtain clearer sound by manually switching to fixed monaural mode.

NOTE:

- Once MONO mode is selected, the TV sound remains monaural even if the TV set receives a stereo broadcast. You must switch the mode back to STEREO if you want to hear stereo sound again.
- Selecting MTS while in the INPUT mode does not change the type of sound; in this case, sound is determined by the video source.

CLOSED CAPTION

HOW TO SET CLOSED CAPTION.

- Your TV is equipped with an internal Closed Caption decoder. "Closed Caption" is a system which allows you to view conversations, narration, and sound effects in TV programs and home videos as subscript on your TV screen as shown on the right.

- Not all the programs and videos will offer closed caption. Please look for the "CC" symbol to ensure that all captions will be shown.
- Closed Caption broadcast can be viewed in two modes: CAPTION and TEXT. For each mode, two channels are available, CH1 and CH2:

The [CAPTION] mode subscripts dialogues and commentaries of TV dramas and news programs while allowing clear view of the picture. The [TEXT] mode displays over the picture other various information (such as TV program schedule, weather forecast, etc.) that is independent of the TV programs.

- 1 Press *MENU* to access MAIN MENU screen.
- 2 Press *CH UP* (▲) OR *DOWN* (▼) to move the "◆" mark to "CLOSED CAPTION".

CLOSED CAPTION

3 Press **VOL (+)** or **(-)** to access CLOSED CAPTION setting mode

4 Press **CH UP (▲)** OR **DOWN (▼)** to move the "◆" mark to either "MODE" or "SOURCE".

5 Press **VOL (+)** or **(-)** to change the CLOSED CAPTION setting.

6 Press **MENU** to exit

NOTE:

- If a broadcast has CLOSED CAPTION and the **MUTE** button is pressed, the set enters [CAPTION] mode automatically. Pressing **MUTE** again will return the set to its previous condition.
- Closed Caption may malfunction (white blocks, strange characters, etc.) if signal conditions are poor or if there are problems at the broadcast source. This does not necessarily indicate a problem with your set.
- If any button is pressed to call up the ON SCREEN DISPLAY while viewing a CLOSED CAPTION broadcast, the closed captions will disappear momentarily.
- When viewing in TEXT mode, if no TEXT broadcast is being received, for some programs the screen may become dark and blank. Should this occur, set the Closed Caption mode to "OFF".

V-CHIP

- This function allows you to restrict TV programs and also allows you to control TV usage based on FCC data. This function is to prevent your children from watching violence or sexual scenes that may be harmful.
- Restriction of TV programs includes two characters that contain information about the program's MPAA rating and the TV Parental Guidelines. MPAA is restricted by age. TV Parental Guidelines are restricted by age and contents.
- Since a TV program may use either the MPAA rating or the TV Guidelines you should adjust both for complete control.

• Example 2.1: Content-Based setting

For "TV-PG", "TV-14" and "TV-MA" select unblocked ("----") for each content rating but leave "AGE" blocked for "TV-PG" and "TV-14" only.

• Example 2.2: Content-Based setting

For "TV-PG", select BLOCK" for only "V" (Violence). This will automaticall block the higher ratings "TV-14-V" and

CLOSED CAPTION

"TV-MA-V" ("TV-14" and "TV-MA" for Violence content only). Please note that with these settings, blocking does NOT occur if a program is rated only "TV-MA"; it must be rated "TV-MA-V" to be blocked.

• Example 3: Reset an Age-Based setting

For "TV-14", select "BLOCK" for "AGE". This will automatically block the content ratings "D", "L", "S", "V", "FV" for "TV-MA" in addition to "TV-14". Please note that the lower age rating "TV-PG" did not change from its previous settings.

NOTE:

- Content ratings can be modified but only in the combinations indicated by " " in the table on page 16.
- Changing a lower age-rating's content setting to "BLOCK" automatically changes the same higher age-rating's content setting to "BLOCK" regardless of their previous settings.
- Changing a lower rating's "AGE" setting to "BLOCK" automatically changes all higher ratings to "BLOCK" regardless of their previous settings.
- Any rating's "AGE" set to unblocked ("----") must have its content settings individually set.

USING THE VIDEO AND AUDIO INPUT JACKS

CONNECTING VIDEO EQUIPMENT FOR PLAYBACK OF VIDEO MATERIAL.

- When the television is connected to video equipment as shown below, the material being played back on the video equipment can be seen on the television screen.

Connecting video device equipped with video output terminal.

CONNECTIONS

* The S-VIDEO INPUT terminals (IN-1) are used to obtain a higher quality image by importing image signal separated into color and brightness signals.

* The S-VIDEO INPUT terminal is for image signal. Audio signal is to be connected to the IN 1 AUDIO terminals (left and right).

TO WATCH VIDEO MATERIAL PLAYBACK.

- Press the Remote's *INPUT* to select VIDEO INPUT mode to which the video equipment you want to playback is

OPERATION OF REMOTE CONTROL

connected.

- The external VIDEO INPUT mode will change as follows each time the *INPUT* is pressed.

- INPUT mode can be selected by pressing either the *CH UP* (▲) on the TV remote control when the TV is set to the highest channel stored in memory, or by pressing the *CH DOWN* (▼) when it is set to the lowest channel.

NOTE:

- When connecting video or audio equipment to the television, be sure that the power is turned off in order to prevent damage to either the television or the equipment being connected.
- The S-VIDEO terminal has priority over a VIDEO terminal (IN-1). When you want to watch pictures from video equipment connected to a VIDEO terminal, unplug equipment connected to the corresponding S-VIDEO terminal.
- It is the intent of HITACHI that this product be used in full compliance with the copyright law and that prior permission be obtained from copyright owners whenever necessary.
- For detailed information on the connection and use of auxiliary equipment, refer to the instruction manuals of the equipment being used.
- The connection cords can be obtained from your local video store.

OPERATION OF REMOTE CONTROL

UNIVERSAL REMOTE CONTROL

With the purchase of your television set you also have received the latest innovation in remote control technology. With its easy-to-use push-button keypad, your Remote can control your television set and most infrared remote-controlled VCRs and cable TV converters as well.

NOTE:

- Depending on the model, year produced, brand and type of VCR, some models may not be compatible with the remote control.
- Some brands of VCR or Cable TV converter Box may not enable channel selection until the ENTER is pressed.

Example:

When you select channel 24,

- (1) Press REMOTE KEYPAD "2".
- (2) Press REMOTE KEYPAD "2".
- (3) Press ENTER.

For detailed information on the use of the VCR or Cable TV converter Box refer to their operating manuals.

USING YOUR REMOTE WITH YOUR TV

After installing the batteries, set the *TV-CATV* on the remote to the TV position. (If you can change the channel of the TV by pressing *CH UP* (▲) or *DOWN* (▼) on the Remote Control, it is in the TV position.)

"IDENTIFYING" REMOTE VCR AND CABLE TV CONVERTERS

Your Remote Control has been set at the factory to operate your TV and many remote control VCRs and Cable Converters. However, in some cases an easy one-time set-up step may be necessary before the Remote will operate accessory VCRs and Cable Converters.

- In this set-up step, the Remote locates and memorizes the remote control transmitter code for the VCR or Cable Converter.
- Once "identified", the Remote sends the proper remote signals to operate your accessory.
- This identify step will not have to be repeated until power to the Remote is interrupted due to a battery failure.

USING YOUR REMOTE CONTROL WITH A VCR

Once you make certain the Remote Control has "identified" your remote controlled VCR, the Remote Control is ready to operate your unit. The various VCR function buttons on the Remote Control will not operate your VCR if those features are not already found on your unit.

OPERATION OF REMOTE CONTROL

- All VCR buttons will operate whether the Remote Control is in TV or CATV modes.
- For detailed information on the use of the VCR, refer to the operation manual of the VCR.

HOW TO IDENTIFY A VCR

The remote control may already be set to operate your VCR. Try this initial check to see if going on to the following "identify" section is necessary.

- (1) Point remote towards VCR and press **VCR POWER**.
- (2) Does the remote turn the VCR ON and OFF?
 - If yes, the remote is ready to operate the VCR and no further steps are needed.
 - If no, continue to the "identify" section.

TO IDENTIFY YOUR VCR - DIRECT ENTRY METHOD

Use the following steps and list to quickly find the remote control code for your accessory VCR.

- First look up your VCR's remote control code number (page 35) before going through the direct code entry steps control.
- If this procedure does not identify your accessory VCR, use the Search method of identification (described in the next section).

- (1) Slide **TV-CATV** switch to TV.
- (2) Press and hold down **RECALL** and **CH DOWN (▼)** on your remote control.

OPERATION OF REMOTE CONTROL

Then release both buttons.

(3) Within ten seconds after releasing *RECALL* and *CH DOWN* (▼), enter your VCR's two-digit remote control code number using *REMOTE KEYPAD* (refer to list).

- The remote control is now ready to send commands to your VCR.

Some brands have more than one remote code listed due to changes in the remote codes from early to later model years, or due to format differences (VHS/BETA). In such cases, you may have to try more than one code to find the code your VCR accepts.

NOTE:

Depending on the model, year produced, brand, and type of VCR, some models may not be compatible with the remote control.

TO IDENTIFY YOUR VCR - SEARCH METHOD.

(1) Slide *TV-CATV* switch on the remote to TV.

(2) Press *POWER* on the VCR to On.

(3) Stand at least six feet away from the front of the VCR.

Point the remote towards the VCR.

Hold down *RECALL* and *CH UP* (▲) at the same time. KEEP HOLDING THE BUTTONS DOWN.

(4) Watch the Channel Number indicator on the VCR, Channel numbers will scan up when the VCR has been identified.

Release *RECALL* and *CH* (▲) as soon as the channel numbers start to scan up.

The VCR's remote control code number has been identified, and the remote is ready to operate the VCR.

TIPS ON IDENTIFYING YOUR VCR:

If your VCR model does not have the *CHANNEL UP* function on its remote control, it cannot be identified using the *SEARCH* method of identifying. For such models, please try the *DIRECT ENTRY* method of identifying.

Be Patient: a minute or two can seem a lot longer when you're waiting for something to happen, but the code should be identified within two minutes. Remember, it is only a one-time set-up.

Be careful not to let the VCR scan more than five channels when the indicator starts to move up. If you continue holding down the *RECALL* and *CH UP* (▲) after five channel scans, the proper remote code can be passed up, and the two minute identify cycle will have to be repeated.

If a channel change does not occur on the VCR within two minutes, read the identifying instructions again and repeat the steps. Should a channel change still not occur the remote will not operate with the desired VCR..

HOW TO IDENTIFY A CABLE CONVERTER

■ TO IDENTIFY YOUR CABLE CONVERTER - DIRECT ENTRY METHOD.

OPERATION OF REMOTE CONTROL

Use the following steps and list to quickly find the remote control code for your accessory VCR.

- First look up your converter's remote control code number (page 36) before going through the direct code entry steps below.
- If this procedure does not identify your converter, use the Search method of identification (described in the next section).

Home Electronics Division

Hitachi has made every effort to assure you hours of trouble free operation from your unit. However, should you require service, a network of Hitachi Authorized Service Facilities has been established in all 50 states and Puerto Rico. Each facility will provide you with convenient and expedient assistance. Our service hotline operator will direct you to the Hitachi Authorized Service Facility nearest you. Just present proof of purchase and/or delivery receipts to the Hitachi Authorized Service Facility, and service will be rendered in accordance with the terms of the limited warranty as stated on your warranty card or operating guide.

Should you have any questions regarding warranty, service, operation or technical assistance, please contact:
